Developing good oral hygiene habits from an early age is essential for maintaining healthy teeth and gums. Regular brushing helps remove plaque, a sticky film that forms on our teeth and contains harmful bacteria. If not removed, plaque can lead to tooth decay, cavities, gum disease, and even bad breath.

Instilling proper teeth brushing practices in children not only ensures their oral health but also sets them up for a lifetime of good dental habits. By

making brushing a fun and enjoyable experience, we can encourage children to take good care of their teeth.
