When an advanced alien entity known as Dragon attacks the Polity (the political entity governing most of humanity), Cormac is assigned a mission that could save millions of lives. He must track down and destroy Dragon before it wreaks havoc across the galaxy. But the mission is not as straightforward as it seems, and Cormac quickly realizes that he might be up against a threat far greater than he initially anticipated.

A Thrilling Journey

Gridlinked takes readers on a heart-pounding journey through a vividly imagined future. Asher's world-building skills shine in his intricate descriptions of advanced technologies, sprawling cities, and alien species. As Cormac races against time, battling rogue AIs, genetically enhanced assassins, and dangerous political machinations, readers will find themselves completely immersed in the high-stakes action.

Asher's writing style is gripping, fast-paced, and filled with unexpected twists and turns. The author seamlessly blends elements of hard science fiction with thrilling espionage, creating a narrative that is as thought-provoking as it is entertaining. Fans of cyberpunk and space opera will find themselves in literary heaven as they follow Cormac's quest to save humanity.

Unforgettable Characters

One of Asher's greatest strengths lies in his ability to craft compelling characters that stay with readers long after the final page. Agent Cormac is no exception. As a gridlinked operative, Cormac is a complex mix of human and machine, struggling with the weight of his abilities and the toll it takes on his humanity. In outer space you can never feel sure that your adversary is altogether human.

The runcible buffers on Samarkand have been mysteriously sabotaged, killing many thousands and destroying a terraforming project. Agent Cormac must reach it by ship to begin an investigation. But Cormac has incurred the wrath of a vicious psychopath called Pelter, who is prepared to follow him across the galaxy with a terrifying android in tow.

Despite the sub-zero temperature of Samarkand, Cormac discovers signs of life: they are two 'dracomen', alien beasts contrived by an extra-galactic entity calling itself 'Dragon', which is a huge creature consisting of four conjoined spheres of flesh each a kilometre in diameter. Caught between

the byzantine wiles of the Dragon and the lethal fury of Pelter, Cormac needs to skip very nimbly indeed to rescue the Samarkand project and protect his own life.
