Sovereignty is a short novel of the sea, inspired by Melville and Conrad. The sovereignty in question refers to that concept and to its evolution, bookended here by two nautical heroes, each named Sovereign of the Seas. The first of these began the English domination of the seas; it also assisted Charles I to lose his head. The second of these ships was named for the first; it was an American clipper which helped found what eventually became the new republic's dominance over both the sea and commerce but not before its founder had also succumbed to the curse of his adopted country. This fictional account stays close to clipper ship history and to a supernatural dimension which keeps intruding from the past in the ghostly form of the original Sovereign.
